

Avinash Aman

Senior iOS Engineer

Delhi, India | +91 78274 68512 | avinashamanjha@gmail.com | linkedin.com/in/avinashamanjha

Professional Summary

Senior iOS Engineer with 10+ years of experience building native and hybrid mobile applications across health & wellness, fintech, and social platforms. Expert in Swift, SwiftUI, and Objective-C with a strong track record of delivering clean, maintainable code and leading end-to-end app development from architecture through App Store deployment. Experienced in blockchain-based reward systems, RESTful API integration, and smart device connectivity.

Technical Skills

Languages: Swift, SwiftUI, Objective-C

Architecture: MVC, MVVM

Tools & IDEs: Xcode, Interface Builder, Instruments, Auto Layout, Storyboards

Libraries: CocoaPods, Swift Package Manager (SPM)

Frameworks: UIKit, Core Data, Core Graphics, Core Animation, MapKit, Core Location, Combine, WatchKit

Networking: RESTful APIs, JSON, XML, XMPP, Push Notifications, APNS, Cloud Messaging

DevOps & CI/CD: Git, SourceTree, Atlassian, TestFlight, App Store Connect, Fastlane

Other: Blockchain, Smart Device Integration, Social Media APIs (Facebook, Twitter, Google+), XCTest, Agile/Scrum

Professional Experience

LivWell – Move. Burn. Earn. Repeat *Senior iOS Engineer*

Feb 2021 – Present

- Spearheaded development of a blockchain-based health and wellness app using Swift and SwiftUI, introducing a coin-reward system for physical activity that increased daily active users by 40%.
- Integrated smart wearable devices with social media platforms via RESTful APIs, improving user engagement metrics by 25%.
- Managed Apple Developer certificates and provisioning profiles for development and production environments, achieving zero deployment failures across multiple releases.
- Implemented push notifications via APNS and cloud messaging APIs, contributing to a 30% improvement in user retention.

Self-employed *Freelance iOS Developer*

Oct 2017 – Feb 2021

- Designed and delivered 5+ custom iOS applications for clients across fintech and social domains, focusing on rich UI/UX and robust back-end integration.
- Built custom UIKit components (table views, collection views, tab bars, navigation bars), reducing client UI development time by an average of 35%.
- Integrated RESTful APIs and JSON/XML data parsing for real-time dynamic content across iPhone.
- Maintained Git repositories using SourceTree and Atlassian; managed full TestFlight distribution and App Store submission workflows.

AppRoutes Services Pvt. Ltd.

Feb 2016 – Oct 2017

iOS Developer

- Developed and maintained a suite of iOS apps across social, financial, and entertainment domains using Objective-C, Core Graphics, and MapKit.
- Implemented real-time chat functionality using XMPP protocol, enabling low-latency in-app messaging for 10,000+ users.

Projects

Pebble Go

Jan 2023 – Present

Tech: Swift, WatchKit, Watch SDK, Core Data

Smartwatch management app to monitor user activities, track fitness data, and maintain data integrity across Apple Watch and iPhone. Focused on real-time data sync and user engagement.

LivWell Health & Wellness App

Feb 2021 – Present

Tech: Swift, SwiftUI, Blockchain, RESTful APIs, APNS

Blockchain-driven platform rewarding users with coins for physical activities. Drove growth in user health awareness through gamification and social sharing features.

Oodles Rewards

Oct 2017 – Aug 2020

Tech: Swift, Objective-C, RESTful APIs, JSON, CocoaPods

Royalty-based cashback and retail loyalty platform integrated with multiple retail partners. Built scalable reward-tracking engine and optimised partner API integrations to maximise customer retention.

Tiplr

Aug 2017 – Dec 2017

Tech: Swift, Core Location, MapKit, RESTful APIs

Travel platform enabling users to discover, share, and geo-tag travel tips using Core Location and MapKit for optimised location-based results.

CiaoIM

Dec 2016 – Mar 2017

Tech: Objective-C, XMPP, Core Data, AVFoundation

Feature-rich messaging app with text, audio, and video capabilities plus customisable chat themes. Delivered measurable improvements in user retention and satisfaction.

SelfReliant App

Oct 2016 – Dec 2016

Tech: Swift, RESTful APIs, Core Data, JSON

Loan management application providing essential financial services, enhancing user financial literacy and simplifying loan tracking and repayment management.

CiaoPaint

May 2016 – Jul 2016

Tech: Objective-C, Core Graphics, UIKit

Creative drawing application for children featuring custom brushes, colour palettes, and canvas tools built on Core Graphics to enhance creativity and fine motor skill development.

BirdieGolf App

Mar 2016 – May 2016

Tech: Objective-C, Core Location, MapKit

Golf course discovery app using Core Location and MapKit to help users find nearby courses, view ratings, and plan rounds.

Education

Bachelor of Technology (B.Tech.) – Electrical, Electronics & Communications Engineering

RVSCET, Jamshedpur | 2010 – 2014

Relevant coursework: Data Structures, Computer Networks, Software Engineering, Object-Oriented Programming

Extracurricular Activities

- Member, Institution of Electronics and Telecommunication Engineers (IETE) – Sept 2013 to Sept 2015
- Co-ordinator, College Annual Day Events – 2012 and 2013
